

Bloomberg News National Poll

SELZER & COMPANY
1,001 general population 18+
Margin of error: ± 3.1 percentage points

Study #2094
March 7-10, 2014
Weighted by sex, age and race

Methodology

March 13 (Bloomberg) -- The Bloomberg National Poll, conducted March 7-10 for Bloomberg News by Selzer & Co. of Des Moines, IA, is based on interviews with 1,001 U.S. adults ages 18 or older.

Interviewers contacted households with randomly selected landline and cell phone telephone numbers. Percentages based on the full sample may have a maximum margin of error of plus or minus 3.1 percentage points.

Responses were weighted by sex, age and race to reflect the general population based on recent census data. Results based on smaller samples of respondents—such as by gender or age—have a larger margin of error.
